Projects

GILE Guest House

2022 – 2023

My first Django project for friend of mine's guest house.

- Allow users to browse available rooms, check prices, and make reservations online.
- Integrating secure payment gateways enables guests to make payments for their bookings directly through the website.
- Providing detailed information about the hostel's rooms, including photos, amenities, bed configurations, and any additional services available, location, directions, reviews.
- From the administrator's perspective, the website include tools for managing bookings, updating room availability, monitoring reservations, integration with google calendar.

More than 100 wondefuls in Bulgaria

2009 – 2010

PHP project which I made when I was 10th grade in middle school.

It is a kind of virtual encyclopedia with a registration form and an opportunity to test what you have learned

Achievements

National Web Development Competition WebLoz'12

2012

With "More than 100 natural wonders in Bulgaria" project we took 8 place out of 20 on national competition with 63/100 points. My colleague helped me for typing the data on database.

National tournament in informatics and information technologies "John Atanasov"

2011

On autumn edition of the tournament in Shumen I've made it to 10th place out of 18 with 58/100 points.
